

# Map out your suppliers on 'My Network' page...

The newly created 'My Network' area now gives you the option to display the locations of all customers and suppliers on a single map...

## A powerful online tool for supplier management...

As part of ongoing improvements to the platform's [Supplier Approval](#) module, the network screen has been updated to include a clickable map for a visual overview of your entire trading network.

This means that members can now:

- **Zoom out to see a global overview of their trading network**
- **Apply filters to narrow down the search e.g. company type**
- **Zoom in to search a localised area**
- **Identify trading relationships with colour coded pins**
- **Click to see an overview of a particular business, or expand to view the full company**

## profile
